

MEMORANDUM FOR: JCH  
John:

For Review

What to do? What to do? ☐ answer to  
your questions is of little help.

I believe the main factors in this issue are these: (1) the reports in themselves are of little or no use in giving a picture of what the Center or other NTP participants can or cannot produce; and (2) they are symbolic in nature to those on the EXSUBCOM who feel that they are responsible for monitoring NTP programs.

On the periphery is the issue that has never been faced squarely, i.e., is the role of COMIREX and its Committees, that of managing the NTP Program and those who participate in it, or serving as a coordinating, clearing house, information-passing, guideline-setting mechanism?

(DATE) \_\_\_\_\_

Declass Review by NIMA/DOD

(over)

COMIREX with a full-time staff has set up elaborate bureaucratic mechanisms to give the appearance they they are running the show when in fact they are not and never can. NPIC as the most "national" of the NTP participants most frequently feels the brunt of the pressure from those who feel that they have a responsibility for controlling its actions.

I believe there is a good deal of confusion on all sides relating to our posture vis-a-vis COMIREX and recurrent pressures for a showdown. I don't see that there is much to be gained from conducting a full-fledged warfare over this issue now. A time may come when the whole role of COMIREX is up for review at which time this type of requirement could be surfaced. In the meantime, it's pretty hard to fight city hall. If we refused to give EXSUBCOM the information until the need for the info was proved to our satisfaction, this would be cited as yet another example of our uncooperative attitude.

Re attached:

- (A) Would once every six months lessen the paperwork burden?
- (B) Do the NTP organizations schedule their PI work on a quarterly basis?

W

- (A) This would reduce our submissions from 4 to 2 per year but the reduction in paperwork would be relatively insignificant.
- (B) The work of the other PI organizations falls into two gross categories - (1) direct support to their parent organizations and (2) support to the NTP Basic Program.

We are not aware of any scheduling regarding the first category - in fact the nature of the work mitigates against scheduling. The second category support to be proposed on a quarterly basis? Though this has not been achieved. 1/2/80

UNITED STATES GOVERNMENT

# Memorandum

TO : JH

DATE: 1-23-70

FROM : PNS

SUBJECT: Resources Information Report for COMIBEX

John:

(got them from Denny for info)  
Attached are unofficial copies of the "CIA" & "DIA"  
responses to COMIBEX - As you can see they both critically  
state "needed valuable" - have I expect COMIBEX to say

"Continue"

TOP SECRET

16 January 1970

MEMORANDUM FOR: Executive Secretary, COMIREX

SUBJECT : Assessment of Need for Resource Information Report.

REFERENCE : Memo to Chairman, COMIREX; Subject - COMIREX Resource Information Report, First Quarter FY 1970, [redacted] dated 1 December 1969.

1. A review has been made in CIA of the First Quarter FY 1970 Resource Information Report and, as suggested by NPIC, an assessment made of the need for continuing to maintain this type of data in the COMIREX.

2. In regard to need, the CIA Member of EXSUBCOM has found this kind of information to be quite useful, and feels that as more data is accumulated the value will increase with time. In his experience no other units of measure, such as numbers of requirements or numbers of responses to requirements, are as meaningful as the man-hours figures. It is most useful for him, as a requirements officer and member of the EXSUBCOM, to know the order of magnitude of various PI efforts involved. Without this kind of knowledge one can easily find himself devoting an unwarranted amount of attention to a project involving a minimum amount of PI effort while treating more lightly another project which may be very time consuming for the PI organization.

3. The information that appears in the Resource Information Report provides a convenient means for assessing the impact on exploitation of decisions made by the EXSUBCOM and by COMIREX. Examples would include: (a) Comparative data on PI effort devoted to First Phase versus Second Phase Exploitation; (b) Relative costs of exploiting different kinds of satellite missions; (c) Comparison of PI costs for the exploitation of aircraft missions versus satellite missions; (d) Relative amounts of PI effort being expended against the various NTP categories; (e) Trends from one year to the next in the exploitation of photography.

4. It should be pointed out that CIA does not circulate the Resource Information Reports to the Production Offices. We believe that the practice of limiting the dissemination of these reports to the COMIREX member and the EXSUBCOM member should be continued, and that possibly one copy to the EXSUBCOM member of each organization will eventually suffice. Also if publication of the reports on a quarterly basis

TOP SECRET

Copy 1

TOP SECRET

→ creates a hardship anywhere along the line, CIA would agree to a lesser frequency. / However, since the NTP organizations schedule their PI work on a quarterly basis, this would seem to be the most convenient timing for publishing the Resource Information Report.

→ 5. In the presentation of the data in the Resource Information Reports there is some repetition and overlap which might be eliminated. On the other hand it might be useful to include certain cumulative data for periods longer than a quarter. It is suggested that EXSUBCOM make a page by page review of the format and content of the Resource Information Report within the next 90 days and recommend changes that they agree would be desirable.

## DEFENSE INTELLIGENCE AGENCY

WASHINGTON, D.C. 20301

9 JAN 1970

(2)

SUBJECT: COMIREX Resource Information Report

TO: Chairman, Exploitation Subcommittee

1. In response to your request during the EXSUBCOM meeting of 2 December 1969, DIA has again examined the need for continuation of the quarterly COMIREX Resource Information Report. We consider the resource report to be an essential tool for effectively monitoring the national exploitation program and strongly recommend it be continued.

2. The resource information reports prepared to date have been particularly useful to those concerned with exploitation prioritization and requirement management, and have furnished the basis for generalized inputs to studies regarding all-source intelligence priorities. The comparative imagery interpretation manhours applied to various types of objectives, specific geographic areas, and phases of exploitation, have often proven to be a more effective measure of the national effort than have data relating solely to report production.

3. In order that the Resource Information Report may reflect the entire II effort applied to national first-phase exploitation, DIA will, in the future, provide statistics as to manhours expended by the OPIC-A.

DIA Member  
EXSUBCOM

cc: Chairman, COMIREX

NPIC-D-310-69  
18 November 1969

MEMORANDUM FOR: Chairman, NIDBWG, COMIREX

SUBJECT : COMIREX Resource Information Report

1. The attached COMIREX Resource Information Report represents the fourth such report submitted by the Center.

2. In our opinion, sufficient time has elapsed since the initiation of this requirement by COMIREX to allow for an assessment of its use and value. We suggest such an assessment be undertaken. Neither the report we submit nor the file of which it becomes a part (COMIREX Resource File) is directly useful to the Center.

3. We will, of course, continue to maintain records of such data for Center management purposes, and we will welcome specific inquiries on matters of COMIREX concern.

30 October 1969

MEMORANDUM FOR: Deputy Director, NPIC

SUBJECT : COMIREX Resource Information Report

1. Attached for forwarding to COMIREX are Tables A, B, and C of COMIREX Resource Information Report for the period July - September 1969.

2. The applied manhours were derived from the MIS, while data pertaining to target and geographic area coverage were obtained from IEG. The IEG reports targets by geographic area on 1st and 2nd Phase Mission Exploitation -- but only upon completion of a particular phase of exploitation. Consequently the MIS frequently reflects manhours against some phase of mission exploitation for which there are no available target counts. These "untargeted" manhours are incorporated in Table A as part of total PI effort for 1st and 2nd phase exploitation. The average man-hour per target factor used as a basis in compiling applied manhours to geographic area - satellite missions (Part I & II) does not include these untargeted manhours.

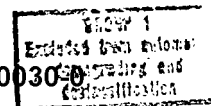

3. This first quarter of FY 70 witnessed an expenditure of 64,758 P.I. manhours. Application of this total is as follows: 1st phase 8%, 2nd phase 63%, basic 18%, and non-basic 11%. Exploitation by geographic area saw the greatest manpower expenditures going to the USSR (33%) with Southeast Asia next (14%). During the quarter there were 84 basic reports and 26 informal non-basic reports produced.
